Boat Abstracts

Andrew's Boat Abstract Variations

These images were almost wholly processed in Smart Photo Editor by Andrew Buchanan (andrewb2012) and this collection shows the wide variety of results that can be achieved by using the program.

The effects used were mainly from Andrew's own contributions, but on occasion other contributors effects were used in combination with his own.

No attempt was made to record the effects used, because this selection was chosen from over 1,000 variations created using 'Batch' processing in a single day.

This album was published in Photoshop Elements 11.

All images copyright Andrew Buchanan 2014.
